

COVID - 19

WHAT CAN WE LEARN FROM THE SPREAD OF CORONAVIRUS IN SOUTH KOREA?

South Korea has been successful in “flattening the curve” of COVID – 19. We looked at data that allowed for a quick and swift response to the outbreak.

Who is spreading this virus?
Who is contracting the virus?
Who is most vulnerable to the virus?

We looked at age, gender, and high-risk groups to evaluate the spread and treatment of the virus in South Korea.

1

Who is spreading COVID - 19 in South Korea?

LEA
